Aleksandr Zhukov

Lead Product Designer

Lead Product Designer

[FunJoin](#)

May 2022 – Jun 2026 / 4 yrs

California, United States

FunJoin is a US-based B2B2C SaaS platform for activity providers, supporting registration, scheduling, payments, applications, forms, attendance, medical workflows, communication, reporting, and daily operations.

Owned UX/UI for the Admin Panel, Customer Account, and Employee Mobile App. Worked directly with the founder and CTO. In the absence of a dedicated Product Manager, contributed to product backlog development, task prioritization, and platform strategy.

- Led design work: mentored a UI/UX designer through 1-on-1s, design reviews, and task setting, and coordinated freelancers on marketing projects including websites, POSM, and promo materials.
- Designed and shipped a flexible Payment Plans system across checkout, admin billing, recurring payments, installment states, reminders, and edge cases, growing adoption from 1.5% to 24.3% of completed orders.
- Led UX for rule-aware self-scheduling across eligibility, capacity, conflicts, waitlists, rescheduling, and multi-participant scenarios, helping increase admin-first-to-self-service transition from 13.6% to 52.3%.
- Improved checkout and registration-critical flows during a period when combined drop-off decreased from 36.7% to 13.5%.
- Worked on complex platform modules: smart forms, applications, medical center, discounts, credit-based payment system, reports, data exports, and settings for different business types.
- Maintained the design system, UI patterns, state templates, product documentation, and development specifications.
- Used product metrics, customer development interviews, user feedback, usability testing, and competitive analysis to validate hypotheses, identify friction points, and improve user journeys.
- Applied AI-agent workflows and LLM tools to analyze scenarios, create interactive prototypes, validate hypotheses, structure requirements, and prepare product documentation.

UX/UI Design Engineer

[Onomatet | Branding & Digital Agency](#)

May 2016 – Apr 2022 / 6 yrs

St Petersburg, Russia

Co-founded a boutique digital agency focused on branding, websites, landing pages, e-commerce, custom web solutions, and visual systems for small and medium businesses.

- Led digital projects from client briefing, market research, and competitive analysis to UX/UI design, visual direction, development, launch, and support.
- Designed websites, landing pages, customer portals, booking forms, e-commerce flows, and custom interfaces with business-specific logic.
- Created brand identities, visual systems, presentations, marketing materials, digital communication assets, and style guides.
- Worked directly with clients to clarify business goals, define user needs, present design concepts, align priorities, and defend design decisions.
- Combined design and front-end implementation using HTML, CSS, JavaScript, PHP (WordPress), payment integrations, and custom forms.
- Created reusable UI patterns, design templates, and internal processes to improve delivery speed and maintain visual quality.
- Built practical experience across services, healthcare, education, small business, e-commerce, corporate websites, and digital products.
- Developed a strong foundation in composition, typography, visual hierarchy, grids, responsive design, and production-ready design execution.

Data Analysis Specialist

Carlsberg Group

Jun 2014 – May 2016 / 2 yrs

St Petersburg, Russia

Provided analytical support for business decision-making through reporting, forecasting, market research, and data analysis.

- Created analytical reports, forecasting models, dashboards, and performance tracking materials for management teams.
- Analyzed market data, competitive dynamics, trends, and business growth opportunities.
- Built an analytical foundation that later became part of my product design process, especially in funnel analysis, product metrics, and data-informed UX decisions.

Skills & Tools

- **Expertise:** Product Discovery, User Flow Mapping, Rapid Wireframing & Prototyping, Systemic Design Architecture, UX/UI Design, Quantitative Data Analysis, Competitive Intelligence, Journey Mapping, Service Design, Cross-Functional Workshops, Stakeholder Alignment, Frontend Development.
